

## Ground Handling Procedure Alert

Effective date: 14JAN2026

### **PROCEDURE ALERT - BABY STROLLER NOT ACCEPTED AS CABIN BAGGAGE ON EMBRAER E195**

#### **Introduction**

For a long time, we have had challenges with accommodating baby strollers in the cabin of the E195. There is slightly less space in the overhead compartment and under the front seat on this aircraft type. This has led to problems and the necessity to move the stroller down to the cargo area, which in turn has led to discussions and delays.

#### **Effective immediately**

With immediate effect we only allow baby strollers of the umbrella type with maximum measures 20x20x100 cm as cabin baggage on E 195.

All other types of collapsable stroller are no longer permitted in the cabin on Embraer E195.

**SAS**

## Permitted as cabin baggage on E 195

Small stroller.

**Figure 23.3.3-1:**

Dimensions in this example: 20 × 20 × 100 cm.

Details:

- Maximum weight 8 kg.
- Must be fully collapsible as in the picture above.
- Strollers with additional parts, such as hood, basket, umbrella, are not allowed into the cabin.

## Not permitted as cabin baggage on E195
