SPECIFIC REGULATIONS:

United States of America

For dogs transported to the United States, starting from August 1st, 2024 new procedures must be followed to allow the animal's entry into the U.S., as required by U.S. authorities to prevent the risk of spreading canine rabies. These procedures vary according to whether the countries visited by the dog in the previous 6 months are considered low- or high-risk.

United Kingdom

In the United Kingdom, the transport of animals is not permitted, with the exception of assistance dogs. Local Authorities should be contacted if necessary.

Israel

The transport of dogs and cats to Israel is regulated by specific legislation.

Brazil

The transport of animals is subject to the International Zoosanitary Certificate (CZI).

United Arab Emirates:

For flights from IT to DXB, all types of animals must be transported exclusively via cargo

Transport of brachycephalic pets in the hold

Starting October 26th, 2025, ITA Airways will suspend the AVIH service for all brachycephalic dog and cat breeds due to their increased health risks during hold transport. Bookings confirmed by October 25th, 2025 will still be honored, but no new reservations or changes will be allowed after that date. Transport in the hold will remain available only for non-brachycephalic breeds, and cabin transport will continue according to the established weight and size limits.

1.4 Hand Baggage

Hand baggage must weigh no more than 8 kg and measure no more than 118 cm (55 x 40 x 23).

In Economy and Premium Economy, only one piece of hand luggage is allowed. Business Class passengers are permitted to carry an additional hand baggage in the cabin, alongside their personal item. In case of upgrade, the application of the original ticket will be applied in economy or premium. Because of different local regulations for flights from USA and from INDIA will be excluded from these new guidelines and will maintain the policy of one piece of hand luggage also in Business Class (INDIA max 115cm).
