

## **Topic: ITA FLIGHTS REMOTE POS V134 – V178**

- As soon as the A/C is on block, the ramp agent speaks immediately with CPT and ask if any technical problems are known.  
In case everything OK , the ramp agent gives boarding OK.  
Immediately, while incoming pax are getting off the plane

If the last pax arrives really 15 minutes before STD and gate agent must wait for him, the code to be used is 89 SI remote position V156 or 175...whatever.

In summary , on these POS , when Aircraft is onblock , with CPT confirmation boarding OK.
