

TO : Ground Handling Companies
FROM : Aviation Security Department
SUBJECT : Responsibility for Challenging to Prevent Unauthorized Access

Dear Partners,

We would like to remind you of the critical responsibility for challenging unauthorized or unrecognized individuals in security restricted areas, as mandated by the Pegasus Airlines Ground Operations Manual and the Air Carrier Security Program (ACSP), prepared in accordance with international Aviation Security regulations and standards.

All ground handling personnel are required to monitor aircraft during service, maintenance, and cleaning operations to ensure they are protected against unauthorized access. It is essential to prevent any unauthorized person entering or remaining near aircraft, cargo holds, or other critical areas. **If an individual approaches or attempts to gain access to an aircraft without proper authorization or identification, they must be promptly challenged to verify their legitimacy.** Any unauthorized person must be reported immediately to supervisors and airport authority.

Please ensure that challenging is a part of routine procedures and compliance during ground handling services around the aircraft.

Thank you for your cooperation.

Best Regards,
Aviation Security Department
