- ✓ Click the “Continue” button to save the information.
- ✓ After updating the APIS details, the **TIMATIC** response will be refreshed accordingly. **The check-in process should continue based on this updated TIMATIC result.**

# Only Online Check-in Outbound List

- It is highly recommended that the **“Only Online Check-in Outbound List”** available in our DCS system be checked prior to boarding. This list contains the details of passengers who have completed online check-in but have not proceeded to the counter.
- Regular monitoring of this list provides the following benefits:
  - **Verification of API/PNR accuracy:**  
If passengers who have completed online check-in do not report to the counter, any missing or incorrect APIS information can be identified and updated in a timely manner.
  - **Completion of document and eligibility checks:**  
Travel documents requiring counter verification—such as passports, visas, and other related travel permits—can be reviewed for passengers identified on this list, reducing operational risks.

We didn't start aviation in Türkiye but  
we transformed it!

*Thank you*
