

MESSAGE OF THE MONTH – AUGUST 2025

GO SAFE

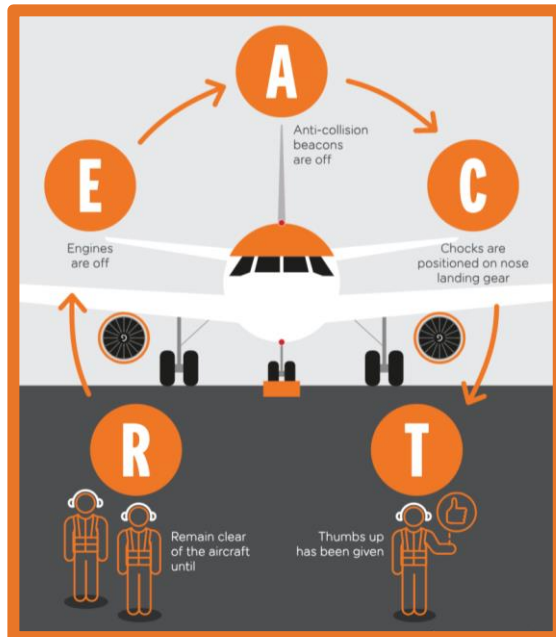

WHEN WORKING AROUND RUNNING ENGINES

ALWAYS REMEMBER REACT...

- Remain clear of the aircraft until:
- Engines are off
- Anti-collision beacons are off
- Chocks are positioned on NOSE landing gear
- Thumbs up has been given

CAUTION WHEN THE APU IS IN OPERATIVE...

- An INOP APU briefing with everyone involved **MUST** be performed before aircraft arrival
- A nominated person may approach the aircraft to check the **NOSE** landing gear only and connect GPU/FEGP whilst engines are running
- Only when the engines are **OFF**, ACBs are **OFF** and thumbs up has been given can the remaining team members approach the aircraft
