TUI fly Netherlands (TFL-OR) / TUIfly Germany (TUI-X3)

Date of Publication: 13 MAR 25

Validity Period: 17 MAR 25 – UFN

Dear Handling Partners,

To further improve our fuel saving & sustainability targets, we have developed a new method to reduce CO2 emissions by optimizing the use of Ground Power Units (GPUs). GPUs burn significantly less fuel compared to Auxiliary Power Units (APUs). This new sustainability initiative will use both the GPU and the APU together, making it essential to connect the GPU as soon as the aircraft arrives on stand.

Please note that this initiative **only applies to TUI B737 aircrafts**.

For more information on GPU usage, please refer to GOM ref 4.1.4.1 and GHM ref 9.2.3.2.

Thank you for your cooperation and commitment to our sustainability goals.

Kind regards,

TUI Airline Ground Operations
