Instruction Notice

Infant & child restraint device on restricted seats

Notice: GOIN24-001R1

Page 1 of 5

To: All stations
From: Paul Cowley, Regulations & Standards Specialist
Approved by: Jan Timmermans, Head of Network Operations
Nial Mclean, Head of Station Operations
Kay Bartels, Deputy Nominated Person Ground Operations TUI

Applicability: TUI Airways (TOM-BY) / TUIfly Nordic (BLX-6B) / TUI fly Belgium (JAF-TB) / TUI fly Netherlands (TFL-OR) / TUIfly Germany (TUI-X3)

Date of Publication: 11 JAN 2024
Date of Revision 1: 12 JAN 2024
Validity Period: 11 JAN 2024 – 11 JUL 2024

Dear Check-in & Passenger Services Team,

Vigilance must be taken during check-in for any infants that have been pre-seated and that they have not been allocated any seats as per the restrictions shown below. If an INF has been pre allocated a restricted seat, then they will have to be resealed to a seat with no restrictions.

Infants must either use loop belts connected to the safety belt of the adult's seat or use a child restraint system.

All infants under the age of 2 years must be properly secured by means of an infant seatbelt or be secured in a child restraint device (CRD) which is secured to an aeroplane seat by means of the passenger seatbelt. A CRD is a company provided 'supplementary loop belt', or a passenger supplied device. This adult may hold the infant in their arms and the safety belt of this adult seat shall not strap the infant but only the adult.

- CRDs include supplemental loop belts
- CRDs less than 40 cm (16 inches) wide will fit in aeroplane seats

Car Seats (CRD)

The car seat will be supplied by the passenger and must be placed on a passenger seat and secured by the passenger seat belt.

For car seats, a window seat is the preferred location. Other locations may be acceptable provided that access to the aisle from any other seat in that seat row is not restricted. The person responsible for the infant/child must occupy an adjacent seat in the same row.

Special Categories of Passengers (SCP)

This includes persons requiring special conditions, assistance and /or devices when carried on a flight shall be considered as SCPs including at least PRMs, infants, unaccompanied children, deportees, inadmissible passengers, and prisoners in custody.

An SCP is only required to travel with an accompanying passenger, when it is evident that the SCP is not self-reliant and carriage could pose a safety risk to himself or other passengers. Refer to table below on information to be provided by SCP category.

SCP Category

- Unaccompanied child
- Adult travelling with an infant
- Physically disabled passenger (aided walking)
- Passenger with disability of upper or lower limbs
- Passenger with disability of both upper and lower limbs
- Visually impaired passenger
- Passenger travelling with a recognised assistance dog in the cabin
- Stretcher occupant

A detailed seating chart for a Boeing 787-9 aircraft. The chart shows the layout of seats across the fuselage. Red rectangular boxes highlight specific rows of seats that are restricted for use with Child Restraint Devices (CRDs) or Stretcher/Companion Seats (SCPs). These restricted rows are located in the front, middle, and rear sections of the aircraft.
