

BULLETIN

Issue:	2026-01
From:	Corendon Airlines Ground Operations
Date	3/24/2026
Subject:	Delay Codes With Sub-Codes

Dear Partners,

Please be informed that Corendon Airlines and Corendon Airlines Europe delay code system has been revised. With effect from **01 April 2026**, existing IATA-based master delay codes will be supplemented by a mandatory sub-code structure. This update is intended to enhance delay data accuracy, improve root cause analysis, and support the airline's on-time performance reporting.

This bulletin applies to all ground handling agents and service providers operating on behalf of Corendon Airlines at all stations. All personnel responsible for delay reporting and movement (MVT) message preparation are required to familiarise themselves with the new sub-code structure and apply it accordingly.

INSTRUCTIONS FOR USE

- When reporting a delay, the applicable master code must always be accompanied by the corresponding sub-code.
- Where a sub-code is designated "Others" (e.g. 04D, 06O, 09O, etc.), it is mandatory to specify the reason in the MVT message.
- For Code 05 (Unconfidential Delays), the root cause must be provided within 8 hours.
- Note that Code 47 (Stand-By Aircraft) is to be used at AYT station only.
- Where technical damage is involved, the distinction between Code 41 (defects) and Codes 51/52 (damage during flight/ground operations) must be observed carefully.

The complete list of master codes and sub-codes is provided in the table below.
