# LFI: Incorrect Passenger Allocation on LFC (ASR/218105)

Dear Team,

the issue involved an incorrect input of the gender split data on the LFC. Instead of taking the numbers from Seats Allocated section of the Flight Closure Report, TRC indicated the passenger numbers from A/C seating split (Zone A/B/C) as Male/Female/Child/Infant split. An error was not identified prior to departure. Although the aircraft departed safely, the discrepancy was only identified after takeoff by the flight crew, requiring in-flight recalculation and confirmation of W&B figures.

**LFC with wrong figures:**

Flight Closure Form and Certificate					
Date	AC REG	Flight No.	From	To	Planned TOB (Check-in closure)
05/25	GE200	EZY8640	MUC	LGW	146 11
Males	Females	Children	Infants	PRM	WCMB WCBS WCBR Other
47	53	46	1	MU	MU

  

PAX DISTRIBUTION		
Zone A (1-8)	Zone B (9-16)	Zone C (17-26)
47	53	46

  

Forward Hold		Aft Hold	
CP 1	CP 4	CP 5	CP 6
Pieces: MU	Pieces: 38	Pieces: MU	Pieces: MU
Kg Total	Kg Total	Kg Total	Kg Total

Load in compartment: Authorised/Actual weight used

This could have led to significant problems affecting flight safety.

**Moving forward, I expect everyone to treat the following actions with the utmost importance:**

1. **Cross-Checking** – Seat Allocated figures (Male/Female/Child/Infant) as Seat Allocated Zones (A/B/C) is written in the correct field on LFC.
2. **Attention to Details** – Despite time pressure, always pay attention to details especially when it comes to flight documentation and do not let stress affect your work performance.

Best regards,  
Jasmin
