

AIRPORT FACILITIES – INOP GATES

Hello all,

As many of you have probably noticed, several gates are currently defective. Doors aren't working, printers are down, and monitors won't turn on.

This becomes a serious issue when it affects security – for example, if a broken door allows passengers into restricted areas. **This is not acceptable.**

What should you do? Stay alert.

Be aware of your surroundings.

If you notice anything unusual, **take a closer look.**

If something is **not working properly**, **report it immediately.**

If you're uncomfortable calling the Störstelle yourself, **inform the Supervisor right away.** They can make the call for you.

If you call yourself, please give the ticket number to the SV.

📞 **Störstelle: 069 690 119**

Be responsible. Be aware. Stay safe.

Thank you!

Laura
