Topic: E-Scooter On Pegasus

Dear All

Pegasus Airlines does not accept the transport of Mini-Segway, hoverboard, solowheel, airwheel, balance wheel of any type which uses lithium or lithium-ion batteries on board its aircraft. E-Scooters belong to these as well.

They are not accepted – not in the cabin, not in the hold!

The only exemption is, if the passenger is disabled and needs the e-scooter as a medical device. In this case, it must be booked in advance by the passenger as WCLB or WCBD, and the device must be handled as an EMA!

Should you have such a device at the check-in, please inform the supervisor so the supervisor can clarify with GCC.

Thank you!

Norbert
