### Topic:

LFI Cargo was not offloaded / Reminder Empty Hold Check

Dear Team,

please make always sure that you are doing the Empty Hold Check for Pegasus flights yourself. Communicate with the loading team always.

Incident was on one flight, as Cargo were Tires loaded but not offloaded due to no Empty Hold check from the TRC (time pressure) the tires went back to SAW.

And remember it's a mandatory to do this check and contracted with Pegasus.

Attached you can also see the pictures of the Cargo.

Remember one thing you are the Supervisor on ground. You need to take care of everything what is happening there.

Thanks!

If you have any question, please let me know.

Regards,

Aquil
