

Topic: THE ENTRY / EXIT SYSTEM (EES) OPERATION

Dear all!

THE ENTRY / EXIT SYSTEM (EES) OPERATION

As part of the European Union project, checks will be conducted for our guests traveling with a Schengen visa. In this context, it is mandatory that the visa details, visa categories, and visa types of guests traveling with a Schengen visa be entered into the system completely and accurately.

The verification process will become active once the guest's visa category (A – Transit, C – Tourist, D – Long-Stay) and entry type information, namely single-entry (one entry) or double-entry (two entries), have been entered into the system.

These checks do not apply to guests who are entitled to travel without a visa, or who hold a residence permit, a multiple-entry visa, or a long-stay visa. Our DCS system will automatically perform the checks during the check-in process. In the event that the EES query result is negative (**NOK EES**), the Travel Documents Department must be contacted.

EES checks are carried out 48 hours prior to departure. If a negative result is received, the check-in process for the relevant guest cannot be completed, and an informational e-mail will be sent to the guest. In addition, a notification e-mail will also be sent to our Operations team, and the necessary follow-up actions will be taken.

If a negative result is received for any guest במסגרת the DCS EES checks, it will not be possible to proceed with the check-in process. The EES query list will be available in the system on a flight basis, and the query results for our guests may be viewed through this list.

Displaying EES-Etias on the seat selection page during check-in,
