

## Topic: Wheelchair PAX Limit on Pegasus Flights

Dear all,

Effective immediately, the maximum number of wheelchair passengers onboard Pegasus Airlines flights is **limited to 8**. Passengers requiring special assistance who have not already booked the service in advance are subject to this limit.

Example 1: 6 WCH\* booked on a flight. If 2 passengers are requesting the service during the check-in, the SSR may be added, and the passengers are accepted so long as the maximum of 8 is not exceeded.

Example 2: 8 WCH\* booked. If an additional passenger is requesting the service, approval must first be requested. Contact the supervisor on duty who will then send the request.
