

## Topic: Usage of Heavy Tags

Dear All

All airlines have their heavy tags. These tags must be used if a baggage **is 23 kgs or more**. At the end of the belt people are going to move and load these bags, for their safety heavy bags must be marked!

And as kind reminder: **bags over 32 kgs must not be accepted**. If a baggage is heavier than 32 kgs, the passenger must repack to reduce the weight of the suitcase.

Thank you!

Norbert
