Topic: Albania E-Visa Control SQsign Application

Dear Partners,

We would like to inform you about the visa control steps of passengers who want to travel to Albania with an e-visa.

- The validity of e-visas issued by Albania must be checked through **"SQsign"** application. You can find the details of the application in the attached file.
- After scanning the QR code on the e-visa through the application, passengers can be accepted to the flight if the visa is valid.
- Additionally, the information on the e-visa must match exactly the information on the passport.
- QR code scanning feature can be used without registering to the application.

Thank you for your attention and collaboration.
