Topic: About the connection times of our guests with transfer flights

Dear Partners,

We can now display the connection times with color between the flights of our guests who have transfer flights in our Checked Inbound and Outbound lists. If there is a connection time of 60 minutes and above, the time is marked in green, if there is a connection between 30-60 minutes, yellow, if there is a connection of 30 minutes and below, the time will be marked in red. This table is working dynamically and the time is updated in case of delay.
