### Topic: Last Flight

Dear Team,

I have a big request for the last flight. Everybody or at least 2 people need to wait until the aircraft is Airborne (in the air), reason is simple, if something will happen after OFF Block, nobody will be at the airport. Usually if everything goes ok, the flight is Airborne (in the air) after 10mins.

It is important, please follow this rule, I know everybody wants to go home asap especially when the flight is already delayed but these 10mins are important.

I would like to also tell our TRC's, please wait on the ramp until the flight is airborne. Same for you anything can be happen after OFF Block.

Thanks! 😊

Regards,

Aquil
