

REMINDER: INBOUND PSMs

Dear all,

Please always check all inbound PSMs in a timely manner.

A lot of times, we have UMs on board and no one is prepared to pick the UM up.

As the Backoffice, you are responsible for checking those PSM messages and inform the SV asap about it. Especially UMs.

Also do not forget to check ARINC and delete the messages which are not needed anymore.

The screenshot shows a flight tracking interface with two main panels. The left panel displays 'Arrivals' for 2024-11-07, showing several flight entries. The right panel is for flight PC993 departing from SAW-FRA. It includes a 'Flight Details' section with the flight number, origin, destination, and status (OUTBOUND FLIGHT). Below this is a 'PSM' (Passenger Service Message) section with detailed passenger information. Red boxes highlight the 'Arrivals' tab and the 'PSM' tab in the right panel.
