Topic: Proper Handling and Return of Check-in Keys

Dear Team,

I would like to take a moment to remind everyone of the proper procedure for handling and returning check-in keys, particularly following a recent incident where a key was not returned and was subsequently lost.

To ensure the keys are properly secured, please avoid placing them in handbags, pockets, or other personal items. Instead, the check-in key should be attached to your clothing, such as your belt or uniform, to minimize the risk of misplacement.

At the end of your shift, it is your responsibility to return the key to the designated key box and place it in the correct slot corresponding to its number. This step is crucial for maintaining the integrity of our key management system.

Additionally, a new section titled "Check-in Key Returned?" has been added to your daily working hours sheet. Please be sure to mark this section whenever the key has been returned.

This is how it looks like now:

1

										Station: _____	
Name: _____										Station: _____	
Personalnummer: _____										Station: _____	
Abrechnungsmonat: _____										Station: _____	
Datum	Von	Bis	Pause	Stunden	Check in Key returned?	Datum	Von	Bis	Pause	Stunden	Check in Key returned?
1						16					
2						17					

Under no circumstances should the key be taken home, as it is the property of the airport and must remain on-site.

Thank you for your attention to this matter and for your continued cooperation.
