

Topic: PETC Transport Box

Dear all,

As we had recently a case where PETC was accepted with a soft bag for carriage I wanted to remind you about the right procedure.

Please check the weight of PETC incl. BOX (8Kg). The Box has to fit under the seat. Do not forget to let PAX fill out the check list for PETC as it is a requirement now for every airline who is transporting PETC. Attached you will see examples which boxes are acceptable and which are not. If PAX didn't meet the requirements for transporting the PETC we have to denied the boarding.
