Topic: Registration of Cabin Baggage on HiSky Flight in DCS

Dear All

HiSky would like us to start registering in DCS whether the passenger has a carry-on or not. This applies only for the trolleys or "larger" backpacks.

Personal items such as laptop bags, duty free bags or any other smaller personal do not need to be registered.

Attached to this R&S you may find a guide from iPort with the steps how this can be done.

In case of questions, please contact Jonathan or your Supervisors.

Thank you!

Norbert

Product Enhancement Summary - HiSky

Overview

- Cabin baggage recording.

Roadmap

1. iPort Check-in - Update Cabin baggage

Via system carrier settings, the allowed pieces is set to 1 and the maximum weight is set to 10 kg per piece.

This indicator is managed by the iPort support team.

Cabin baggage can only be added from the baggage screen where an additional tab named 'Large Cabin Baggage' has been added.

When a valid number of pieces and weight is filled in and the 'Update' button is pressed a message will appear that the cabin baggage is updated and the data will remain, even after closing the window.

3. Load control - Cabin baggage weight

For H4/H7, the cabin baggage recorded is additional baggage weight to the passenger weight, this information will be available for load control in several places.

- Included in traffic load
- Seat row or cabin trim applied to for the cabin baggage weight
- The total weight of the cabin baggage is listed in the load sheet in Passenger/Cabin bag section – CAB
- The cabin weight per destination is shown on ACARS.
- A detailed version of the weights per destination is available in the LDM.
- The total weight of the cabin baggage is listed in PW summary under SI section – CAB
- Visible on main deck view
