Validity Period: 22 DEC 2023 – 22 JUN 2024

Dear partner,

Please find attached TUI Airline's safety poster edition #8.

This Safety Alert is primarily for all our Ground Handling service partners, but all other service partners with TUI operational activities are encouraged to display and share as required.

Following receipt of the safety posters, we encourage you to print and prominently display each within all your operational areas, on notice boards and within rest areas, etc. The principal areas of focus are around ramp, check-in, boarding and dispatch activities, but safety posters and bulletins will not just be limited to these areas.

With your assistance, we want to get our safety messages across to all your operational delivery teams and require your support in helping to reduce safety events and reducing the associated risks & trends.

All key operational staff should have full visibility of these safety notices and posters.

We plan to issue safety posters & bulletins monthly and when we identify increased safety risks and trends.

Kind regards,

TUI Airline Ground Operations

SafeTUI First

TUI Airline Ground Operations Safety Bulletin

Whenever damaged nets, clips or fittings are found inside an aircraft hold, it is imperative that the captain of the flight is informed, so they can record the damage in the aircraft technical log.

If in
doubt,
report it!
