

Topic: Altea – Ineligible to Board List

At the gate, some passengers may have issues preventing them from being boarded on the flight. This may cause disruption in the boarding process that could lead to errors, headcount discrepancies, and delays.

To help identify these issues before they occur Altea offers the Ineligible to Board list. Below is a guide on how to find and use this list.

Step 1: Open the Boarding screen (Ctrl-B).

The screenshot shows the AZ Boarding interface for flight AZ419. The main window displays the boarding status for passengers, including 'Accepted', 'Boarded', and 'Not Boarded' columns. A red box highlights the 'Ineligible To Board' section, which shows 2 passengers. Below this, a table lists 'Not Boarded Customers' with 45 entries. The interface includes a sidebar with various menu options and a status bar at the bottom.

	Accepted	Boarded	Not Boarded
Joining	44 +1 inf	0 +0 inf	44 +1 inf

Open boarding or choose one of the actions on the left to continue

Open Boarding **Back**

In an ideal scenario the Ineligible to Board list will be empty. It is therefore important to reduce the number to as close to zero as possible before boarding begins.

Step 2: Press Shift-F9 to open the Ineligible to Board list.

The screenshot shows the software interface for flight AZ419. The main window title is "AZ Boarding AZ419 (0)". The menu bar includes "Applications", "Device", "Navigation", "Logoff", and "Help". The date and time are shown as "26JUN23 14:53". The "Ineligible to Board" tab is selected. The flight details are: AZ419, 26JUN FRA (2) → LIN Milan Linate, Acceptance Open. The status is: Gate: None, Boarding: 18:40, Baggage: Open. The "Category" column shows counts for various reasons: Baggage (0), Comment (0), Credit Card (0), Fraud (0), Gender (0), Passport (0), Payment (0), Seating (2), Ticket (0), Travel Information (0), and Service (0). The "Ineligible To Board Customers (All Categories): 2" table lists two passengers: BORGHI Matteo and MARTINI Jonathan. Both passengers are marked as "Seating" ineligible. The "Ineligible" column is highlighted with a red box. The "Info" column is also highlighted with a red box. The bottom of the window includes a "Select Customer" input field, a note to "Select a customer e.g. 1", and buttons for "Proceed" and "Exit".

Different ineligibility reasons have different steps to solve and may appear different from one another. If unable to resolve an issue immediately contact your shift lead/supervisor.

Step 3: Click “Proceed” to bring up further information and begin resolving the issue.

There are many reasons passengers can appear on this list. Here are a few of the most common examples:

Seating: Passenger seat has changed, and a new boarding pass should be printed. Always collect the original boarding pass if possible.

They are sitting in the emergency exit row and verification is required.

Comment: A high priority comment exists for the passenger. This should be read and followed through before clicking "Delivered."

Travel information: Regulatory data is missing. Passport, visa, or other data required to travel needs to be inserted into the system in order to accept the passenger. Most often seen on passengers flying to a non-Schengen country such as the United States.

Baggage: Customer has checked baggage that is on Standby.
Customer has unpaid excess luggage.

Important Note: Do not clear any ineligibility issues unless you are certain that they are successfully and completely resolved. (e.g. Passengers sitting in emergency exit row need to be visually and verbally confirmed eligible. Passengers missing travel documentation need to have all required documents checked and input into the system.)
