

Topic: About Used Single or Double Entry Schengen Visas

Dear Partners,

We would like to remind you of the acceptance conditions for single or double entry Schengen visas to Schengen countries.

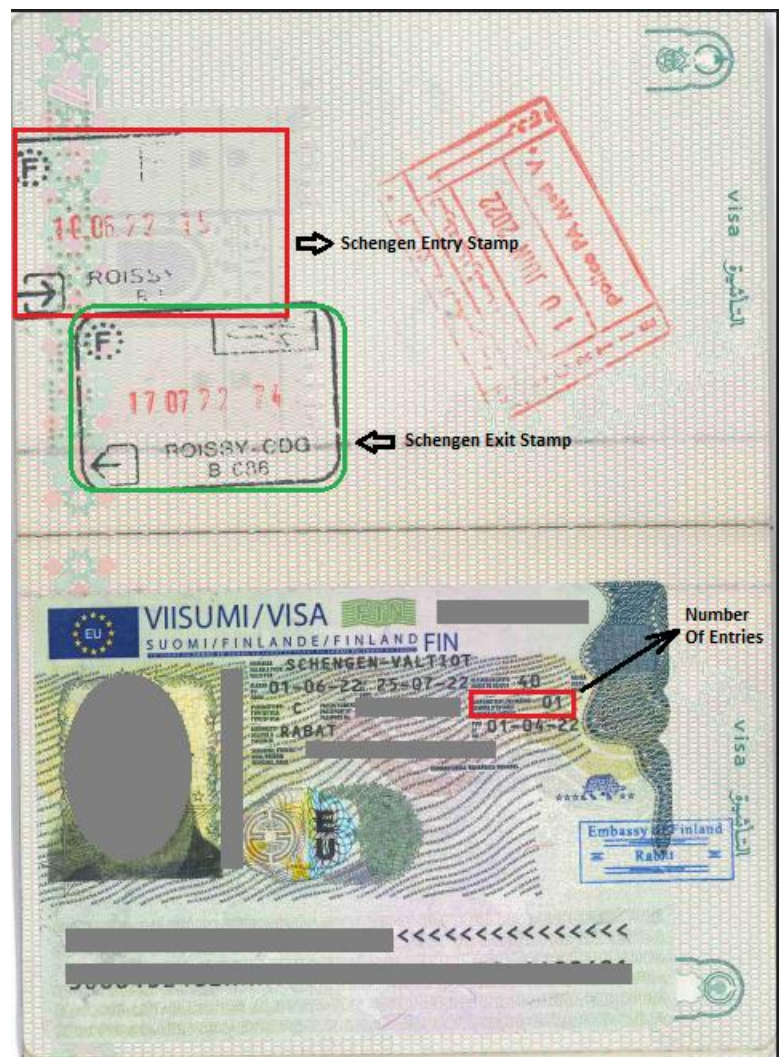

As you know, **Schengen visas are issued as single, double or multiple entry**. This information is written in the "Number of Entries" section on the visa and it provides the visa holder with single, double or multiple entry according to the number of entries.

Passengers with a single-entry or double-entry Schengen visa should be examined more carefully. It should be checked whether the relevant visas have been used before, through the Schengen stamps in the passport. **If visas have been used before, they should not be accepted on Schengen flights.**

We kindly ask you to review the single-entry and used Schengen visa, an example of which you can see below. Thank you in advance for your attention and cooperation on the subject.

Schengen entry stamp: The arrow on the stamp points to the right and the stamp frame is angular.

Schengen exit stamp: The arrow on the stamp points to the left and the stamp frame is oval.
