

## Topic: Correct insertion of CC Two Letter code during sales transactions

Good afternoon,

Following some reports of misalignment by Revenue Accounting Dptm, it was deemed necessary to recall the importance, during sales transactions, of correctly entering all data of the credit card, with particular attention to the correct selection of the two-literal code of the card circuit itself (e.g.: AX/VI/MC etc...)  
Sure of the usual collaboration with the request to disclose the reminder in question, we remain available for any needs

Best regards
