

Topic: TUI – Delay Codes

Dear all,

When sending the MVT, TUI would like to ensure that Delay Codes are used according to their specified reasons. See below.

63 – Late boarding ok because the crew arrived late. The timing of the last crew to arrive on position must be noted in the supplemental information (SI).

85 – Missing PAX. Only used if a baggage search was started. Time PAX arrived/no show to be included in SI.

16 – Missing PAX, bag search not started

00 – TUI's own systems (GoNow, eLoadsheet, etc.) are not functioning.

55 – Airport infrastructure (printer, Fraport, SITA, BRS, etc.) not functioning.

Please always include SI where necessary.

Thank you.
