Topic: Fueling and Boarding at the same Time in FRA

Dear All,

Just a quick reminder about the Fueling and Boarding process at the same time. In general, it is allowed to fuel and board at the same time in FRA, if you have **two pairs of stairs connected** and you or the F/O has to be **connected to the headset**, to communicate with the captain. Please make sure the captain is also on the headset and a communication is possible.

It is always captains' decision and sometimes you will just have to wait until the fueling is finished.

Thank you!

Laura
