

## Topic: BVC/SID LDM Messages

Dear All,

Due to balancing reasons from time-to-time BVC and SID bags are mixed, which in general is not a problem, however BVC is facing some challenges because they don't know how many bags they are supposed to offload, and where exactly these bags are.

As a result, they end up offloading all bags to make sure they don't miss any of the BVC bags.

To make the offloading for BVC easier, I would like to ask you when sending the LDM for these flights, please mention in the SI:

- how many bags are loaded in the different holds,
- which destination in which hold,
- in case BVC and SID bags are mixed in the same hold:
  - how many bags for the each destination are loaded in the given hold,
  - and where the BVC bags are located (e.g. at the door)

An example for a good SI:

SI  
H1 03 CREW BAGS  
H2 64 BVC BAGS  
H3 19 SID BAGS + 52 BVC BAGS NEAR THE DOOR  
H4 NIL

Thank you!

Norbert
