Security Bulletin – 03/2024

Subject: US Secure Flight Overfly Program

Effective: 10ᵗʰ May 2024

Introduction: With the starting of flight operations to/from Canada, it is mandatory to be compliant with both *Canada iAPP* and *US Secure Flight Overfly* programs.

Procedure: During check-in always collect or validate full passport information (including customer's given name/surname, regulatory gender and date of birth) with the data entered/showing in the *Travel Information* mask and update or add any missing data, as required.

For flights to/from Canada, in addition to Canada iAPP responses, Amadeus Altea CM will also return Secure Flight vetting results utilizing the **AQQ** (Advance Quick Query) capabilities.

See an example below:

In the event of an outage please refer to *Security Bulletin 5A/2023*.
