Topic: Recent Increase of INAD Passengers Into Türkiye and Reminder Travel Regulations

Dear Partners,

We would like to inform you about the recent increase INAD passengers into Türkiye and the frequent common travel regulation errors made.

Before the busy season, we kindly ask you to consider the following common travel control mistakes related to passengers before accepted into Türkiye.

- i. **Passport Validity:** Passports which less than 61 days of validity (except for some countries) are not accepted without any exceptions.
- ii. **Refugee Passports:** Holders of refugee passports cannot travel to Türkiye without a consulate visa or Turkish residence permit.
- iii. **ID Cards:** Only the ID cards of certain countries are accepted for entry into Türkiye; other ID cards are invalid and not accepted.
- iv. **E-Visas:** The information on Türkiye's e-visas must match the passport information, and if mentioned, supporting visas or residence permits (validity and physical presentation), as well as any specified restrictions such as age, must be correct.
- v. **Domestic Connecting Flights:** If passengers have two domestic flights within Türkiye, the travel regulations of the final destination country, as well as Türkiye's entry regulations, must be checked.

Please ensure that passengers meet the above-mentioned travel regulations before accepting them for flights. You can check all travel regulations actual on Timatic.

Saygılarımla | Kind Regards,

Lütfü DAŞDEMİR
