

## Topic: Accepting Bags with more than 2 Passengers

Dear all,

I have a small request to everyone. Please try to accept bags, if there is a small group like 4-5 people, only on one name. Why? Because you will accept bags via Baggage Drop, but the system sometimes won't show you the excess weight. If you accept all bags on one name, then you are also able to see how many KGS you accepted and of course first check, that every passenger has allowance or not. In the last days I saw accepting bags for a group of 4 passengers, but you put some one name and some on others, at the end 2KGS extra, because you are not controlling how many KGS you are accepting.

So please always check the weight correctly, also we have some special cases, first flight allowance and 2<sup>nd</sup> no allowance.

Same case you need to always check, if you are adding the 2<sup>nd</sup> flight manually, you need to also check does the 2<sup>nd</sup> flight has allowance or not.

Thank you 😊
