Topic: API DATA Italy flight EasyJet

Dear all

Please be aware that the G7 Summit will be taking place in Italy this month, the Authority has mandated all carriers to provide API data on INTRA-SCHENGEN routes INTO Italy (excluding domestics).

The requirement is for data to be sent from 5th to 18th June, we have switched this on for both collection and sending.

Teams should add customer API where they are prompted to do so during this period.

Any questions please ask.

Thank you
