Topic: Visa validity dates

Dear all

Unfortunately there was an INAD case a few days ago caused by a visa that was not yet valid. The visa was only valid 3 days later than on the day of the flight where PAX travelled. Although it was checked that the passenger had a visa, it was overlooked that the valid date was in the future. Please don't forget that visa is only valid if dates of validation, expiry date and passport details are all correct. Also always check the number of entries. Single entry means PAX can only enter country ONCE (check the stamps) MULTI Entry means that he can enter many times until date of expiry.

Please pay attention to all details on the visa to avoid this mistakes in the future.

Thank you
